PROFESSIONAL SUMMARY

Computer Science undergraduate with strong foundations in Data Structures, Algorithms, and Object-Oriented Design. Skilled in building scalable backend systems, APIs, and microservices using modern technologies. Experienced in performance optimization, authentication systems, API integration, and clean coding practices. Passionate about developing efficient, maintainable, and high-quality software solutions.

TECHNICAL SKILLS

- Programming Languages:** Java, C++, JavaScript
- Backend Development:** Node.js, Express.js, REST APIs, API Integration
- Databases:** MongoDB, MySQL, SQL (Joins, Indexing, Query Optimization)
- Tools & Platforms:** Git, GitHub, Postman, MuleSoft (RAML, DataWeave), Anypoint Platform, CloudHub
- Core Computer Science Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Backend Architecture, Authentication & Authorization
- Frontend:** React.js (Basic), HTML, CSS

PROFESSIONAL EXPERIENCE

Software Developer Intern | Innova Solutions

May 2025 – Mar 2026 | Onsite (Hyderabad)

- Engineered enterprise-level integrations for the PISCES project using MuleSoft, enabling secure communication across systems.
- Delivered and maintained APIs to streamline internal and third-party data exchange.
- Deployed integration workflows on CloudHub, improving availability and runtime performance.
- Partnered with backend developers and QA engineers to deliver reliable and production-ready integration solutions following SDLC best practices.
- Assisted in API documentation and functional testing using Postman to ensure accurate endpoint behavior, proper request-response handling, and reliable integration performance.

Full Stack Developer Intern | Bharat Intern

Jul 2024 – Aug 2024

- Built MERN-based web applications focusing on backend logic and database architecture.
- Implemented secure authentication and role-based authorization mechanisms to protect user data and ensure access control across application modules.
- Collaborated in feature development, testing, and debugging to deliver high-performance and user-friendly web applications within defined project timelines.

PROJECTS

Online Blood Donation System

Tech Stack: Node.js, Express.js, MongoDB

- Created a real-time donor-recipient matching platform to efficiently manage blood availability and user interactions through a scalable backend architecture.
- Designed and implemented RESTful APIs to handle user registration, authentication, and donor-recipient requests, ensuring secure and reliable backend communication.
- Optimized backend performance through MongoDB query tuning, indexing, and application logic improvements to enhance response time and data retrieval efficiency.

Blogging Platform

Tech Stack: Node.js, Express.js, MongoDB, React.js

- Built a full-stack blogging application supporting CRUD operations with secure authentication and role-based authorization.
- Architected APIs for authentication and designed modular backend architecture for efficient content management.
- Implemented input validation, error handling, and database schema design to enhance application reliability and data integrity.

ACHIEVEMENTS

- Solved 200+ DSA problems on LeetCode & GeeksforGeeks, strengthening algorithmic problem-solving skills.
- Participated in Hack India 2024, contributing to feature enhancements and secure system design.

EDUCATION

Bachelor of Engineering in Computer Science

Chitkara University | Apr 2022 – Present
